Ing. Alfonso Schipani s.r.l.

Italian Company specialized in electrical and lighting systems.

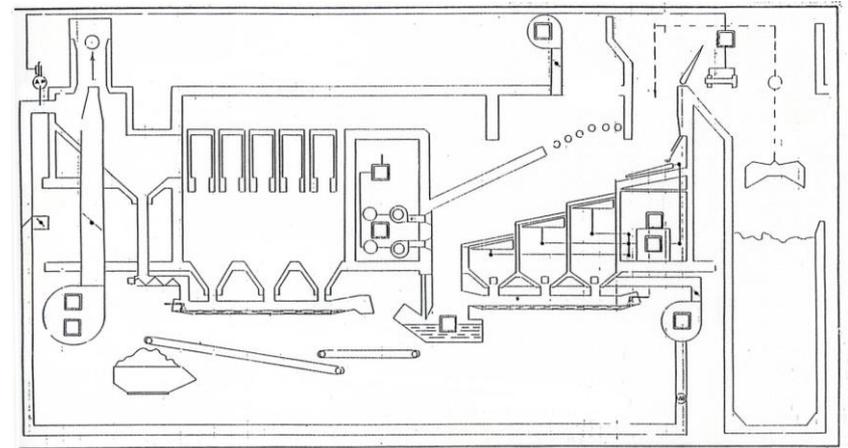

The Company projects, realizes and manages
street and artistic lighting

under the assurance of the Quality System UNI EN ISO 9001
and certification SOA for the category OG 10 unlimited.

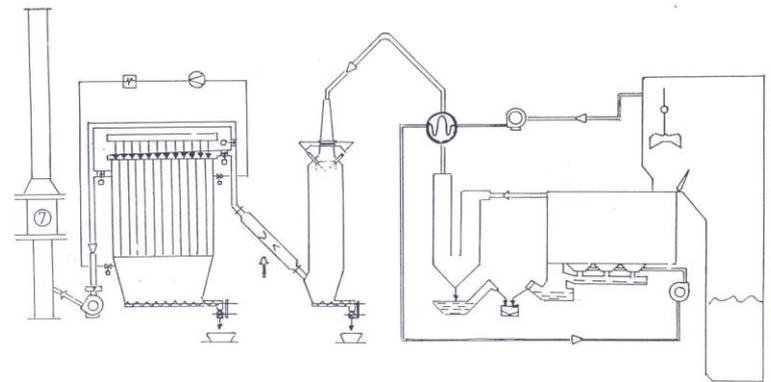

From 1950 till 2000 we made high quality MV/LV power transformers

From 1976 to 1994 we managed waste Incinerator and realized the revamping of the Air Pollution System for environmental respect .

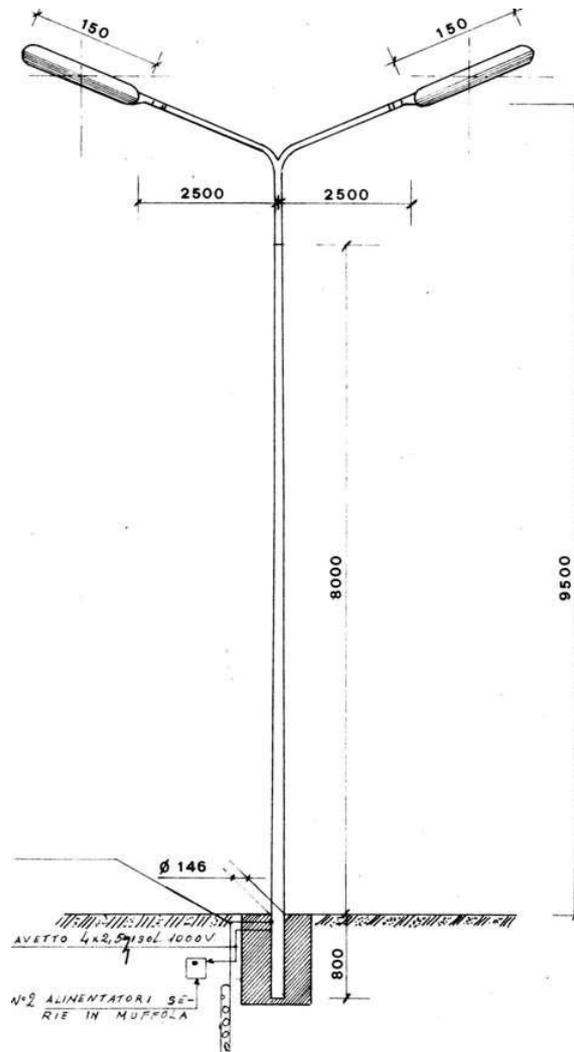

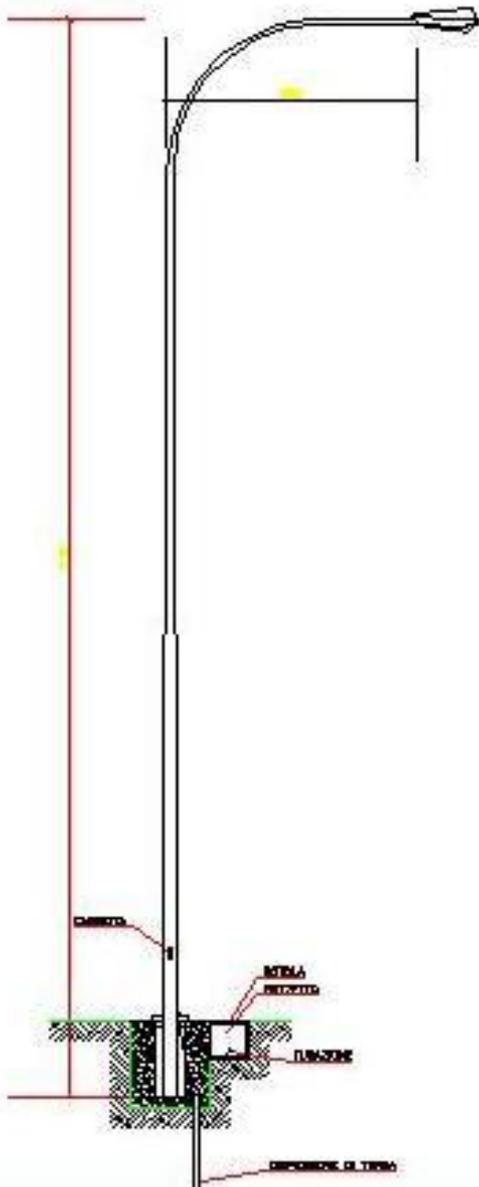

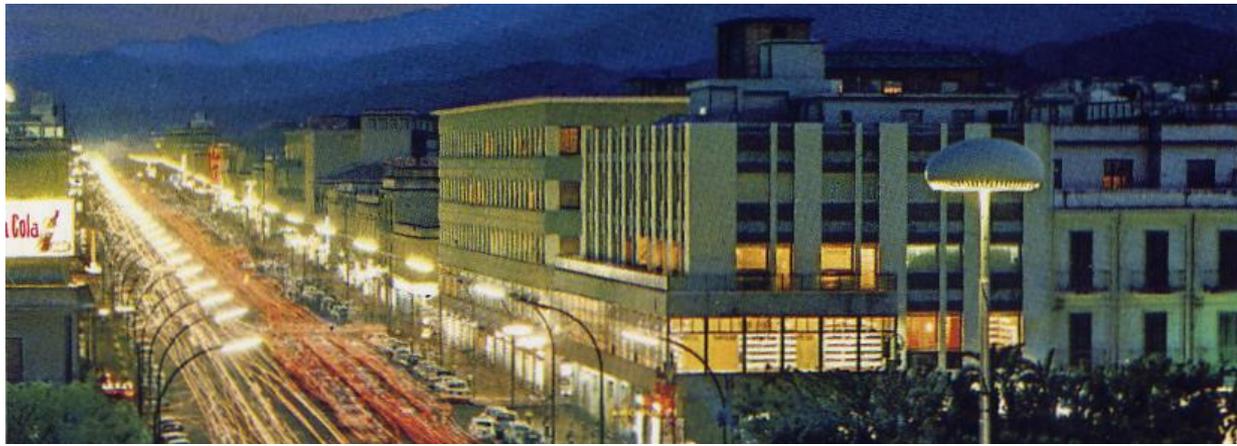

Linea 1 : 1976

Linea 2 : 1994

Since 1960 we realize public lighting systems

Electrical waste

The Company's engagement in environment has been strengthened through a new project aimed to recycle old electrical components by turning them into art/design pieces.

This project called EcoLectric Design^R realizes a new kind of electrical, ecological and artistic eco-design.

Eco*Le*ctric*Design*

The PROJECT proposes itself as a possible model for an efficient environment strategy to be adopted by different manufacturing industries with the purpose of minimizing production and disposal of waste material by means of an intelligent, constructive, creative and ecological approach to the problem:

Eco*Design*

in

FACTORY

Every piece of art is unique and assembled from old unused components of street lighting systems, such as metallic covers, ceramic and glass isolators, screwing bulbs, wooden coils, etc...
